

SUCCESS EXPERIENCES

RESCUE ENROLLMENT STUDY

Sponsor:
Global Pharmaceutical Company

Medical area:
Urology

Study purpose:
A Multicenter International, Randomized, Double-Blind, Placebo-Controlled, Parallel Group Study.

Enrollment issues:
Only 76% of planned subjects enrolled in 2,5 years.

Mains reasons:
Study Design and Eligibility Criterias.

Gregmed performance:
18 additional sites within 3 already participating countries.
Investigators from Gregmed's database.
All contracts with Investigators and Institutions fully executed in 11 weeks.
14 weeks recruitment.

Final outcome:
196 subjects randomized, low screen-failure rate,
screening stopped by the Sponsor.

Time saving:
About 6 months.

Patient retention:
Only 7% rate of drop outs in four years
(group of patients recruited by Gregmed).
